GenOvis Flock Evaluation Report for the 12 months from April 15, 2015 to April 15, 2016.

The small chart in the upper right shows that 106 ewes lambed in May of 2015, giving birth to 300 lambs, followed by 33 ewes in September of 2015 (75 lambs) and 45 ewes in January 2016 (119 lambs).

Ewes are divided by age on the first few rows of the large chart, and combined in the first of the shaded rows, which show that 148 ewes lambed 184 times and produced 494 lambs during this 12-month period, for an average of 2.69 lambs born (2.46 born alive) per lambing, and 2.42 lambs weaned per lambing. The average ewe lambed 1.24 times over the year, and weaned 3.0 lambs with a total weaning weight of 74.7 kg (164 lb.).

The second and third shaded rows show the performance of Stacey and Tara’s flock during the previous year (April 15, 2014 to April 15, 2015), and the average performance of all crossbred ewes on GenOvis for the current year (April 15, 2014 to April 15, 2015), respectively.
